## CERTIFIED COURSES

### DJANGO WITH PYTHON – SILICON UNIVERSITY

June, 2024

Bhubaneswar, India

- Built a Full Stack application of Doctor's Appointment website (PulseAI) using Django and also implemented Machine Learning model to predict heart disease.

### AZURE MASTERS – INGENIOUS-TECH

July, 2023

Bhubaneswar, India

- Deployed a website, connected to database servers, used load balancers and mapped with a Domain Name.

### PYTHON FOR BEGINNERS – SYLLOGISTEK SYSTEMS

August, 2022

Bhubaneswar, India

- Created a simple Restaurant project using file handling methods, importing modules, using conditional statements and by using different pre-defined functions.

## PROJECTS

---

- **Title:** Login/Signup Application using MERN

**Description:**

- A full-stack MERN application for user authentication.
- Built a responsive React frontend for a user-friendly experience.
- Integrated RESTful APIs for seamless communication between the frontend and backend

**Tools:** React, Node, Express, MongoDB, HTML, CSS

**Features:**

- Secure User Authentication
- Password Hashing with bcryptjs
- Profile Update Operation
- JWT-Based Session Management
- Form Validation and Error Handling

- **Title:** Portfolio Website

**Description:**

- A personal portfolio website to showcase my projects, skills, and professional background in web development.
- Integrated responsive design to ensure optimal viewing across devices.
- Regularly updated content to reflect new projects and ongoing learning

**Tools:** HTML, CSS, Bootstrap Framework, Java Script

**Features:**

- Mobile Responsive
- Easy Scrolling for smooth navigation
- Theme Changer
- Download CV from website

- **Title:** Online Quiz Platform

**Description:**

- This platform enables users to register, take quizzes, and receive scores, which are stored in a database.
- The answers will be evaluated based on the user choice of answers and final score with the correct answer will be displayed to the user.
- It also allows users to provide feedback.

**Tools:** Java Servlets, JSP, XML, Eclipse IDE, HTML, CSS, Java Script, Oracle database

**Features:**

- User Registration and Authentication
- Real time Score Calculation
- Feedback System
- Database Integration

- **Title:** Restaurant Page

**Description:**

- This project involved managing menu data and customer orders using file handling.
- Modules and functions were used to improve efficiency.

**Tools:** Python, Python IDLE, Jupyter Notebook

**Features:**

- User panel and Admin panel
- Menu Display
- Order History
- Error Handling

## **ACHIEVEMENTS**

---

- Gold Badge at Hacker Rank for Java
- Silver Badge at Hacker Rank for Python
- Silver Badge at Hacker Rank for C Language
- Silver Badge at Hacker Rank for MySQL

## **CERTIFICATIONS**

---

- Java (Basic) – Hacker Rank, June 2024
- CSS (Basic) – Hacker Rank, June 2024
- SQL (Basic) – Hacker Rank, July 2024
- SQL (Intermediate) – Hacker Rank, July 2024
- JavaScript (Basic) – Hacker Rank, July 2024
- JavaScript (Intermediate) – Hacker Rank, July 2024

## **SOFT SKILLS**

---

- Problem Solving
- Communication Skills
- Flexibility
- Adaptive
- Collaborative

## **INTEREST**

---

- Web Development
- Coding
- Playing Cricket
- Drawing
- Travelling
